Install web2py on Ubuntu 20.04 with Ansible

1. Install Ubuntu 20.04
2. Create ssh key
3. copy-ssh-id to your new server
4. ssh to new server to ensure you can connect without any passwords or prompts
5. cd to ansible playbook directory
6. run `ansible-playbook -i hosts web2py-install.yaml -bK`
7. Enter 'become' password
8. Watch the server install
